Values are total 2014 rates including all ALCOSAN charges

Southern Basin

Northern Basin

Eastern Basin

¹ALCOSAN fees for 15,000 gallons per quarter consist of a \$10.61 service charge plus \$5.05/thousand gallons = \$75.75

²Spreadsheet presents current billing rates, which may not be directly related to actual municipal sewer system operating expenditures. Some communities may fund a portion of their O & M costs by other sources, such as the general fund. Those communities with no local sewer surcharge would be examples. Also, Scott Township has indicated that they also subsidize sewer operations with other revenue sources. These examples are denoted with an * in the table.

³Rates for municipalities that are served by operating authorities may more closely represent actual operating costs. These municipalities are indicated by **.

⁴MHI values from American Community Survey for the 5 year period 2005 through 2009 and stated as 2009 Inflation Adjusted Dollars. The values are for the entire applicable municipality.

⁵% MHI values are based on an assumption of average residential use being 15,000 gallons/quarter. ALCOSAN has determined that their system-wide average residential use is somewhat lower than this amount.
